Site

- https://github.com/Gallopsled/pwntools#readme

Install

- pwntools is best supported on 64-bit Ubuntu 12.04 and 14.04
- https://docs.pwntools.com/en/stable/install.html

Command

```
apt-get update
apt-get install python2.7 python-pip python-dev git libssl-dev libffi-dev build-essential
pip install --upgrade pip
pip install --upgrade pwntools
```

- .

Error message

```
Cannot uninstall 'pyserial'. It is a distutils installed project and thus we cannot accurately determine which
files belong to it which would lead to only a partial uninstall.
```

Command

```
pip install --ignore-installed pwntools
```
