Install

Command

```
sudo apt-get install cmake g++ g++-multilib doxygen transfig imagemagick ghostscript git
git clone https://github.com/DynamoRIO/dynamorio.git
cd dynamorio && mkdir build && cd build
cmake ..
make -j
./bin64/drrun echo hello world
hello world
```

- <https://github.com/DynamoRIO/dynamorio/wiki/How-To-Build>

Guide

- <http://dynamorio.org/docs/>

Sample

- DynamoRIO Sample "Sample".
